PERFECT BUILDING

*LET'S BUILD QUALITY INFRASTRUCTURE
FOR THE BETTER FUTURE*

Perfect Building d.o.o is the sister company of VIBA Green Services in Qatar and VIBA Montage in Slovenia. Extending to Ventilation System, Mechanical Installation, Specialized Steel Works, Electrical Installation, Construction Assembly and Industrial Assembly. Dedicated to perform high quality work that today's project demand for our client. Perfect building have integrated itself in the market of Europe, North America, Asia, Middle East, and Africa. The essence of our business operation is the satisfaction of our client which reflects our competencies, organizational skills, work quality, state-of-the-art equipment, and professionalism. We aspire to create and maintain a long term collaborations with our Partners.

How we integrate:

- Installation of light and heavy construction
 - **The composition and the welding light and heavy construction**
 - Installation of light and heavy channels
 - **Installation of floor and suspended transport equipment**
 - Finishing work from ceramics to painting
 - **Air components and systems unit**
 - Air and climate technology unit
-

FERRARI WORLD

Erected the steel for the worlds fastest roller coaster, the highest loop rid and, the tallest space-frame structure ever built on the planet
Year: 2016
Location: Abu Dhabi, United Arab Emerates

To provide personal growth and development of employees and tangible and intangible conditions for creative life

OUR VISSION

To be recognized on best quality standards in construction, engineering, manufacturing and installation works spanning the world and beyond. Be recognized for its professionalism, speed and quality in the assembly of industrial systems. With a network of successful partner companies we want to offer complete technological solutions in order to fully satisfy customer needs.

OUR MISSION

Perfect Building is dedicated on continuously building up high standard with their skilled workers in the everyday growing construction industry. The team prioritize on making an effort to maintain and form long-term, mutually beneficial relationship with clients, efficiently building trust and good rapport to one another. To ensure that the company's standard on quality, health, safety and values only grows and never diminish. Finally, to guarantee quality project

PERFECT BUILDING D.O.O

Our VALUES:

We build and maintain an attentive relationship with every Client, Supplier, and employee. We take care of this social security of our employees and always listen to them. We perform our services in a fast, quality, and professional manner.

Furthermore, we follow the state-of-the-art technological procedures and practices all the time. May it be in managements or in the production/implementation processes. We constantly train and provide relevant human resources with the company.

OUR AREA OF EXPERTISE

CONSTRUCTION SERVICES

- Industrial
- Car Industry
- Steel Structures

INFRASTRUCTURE

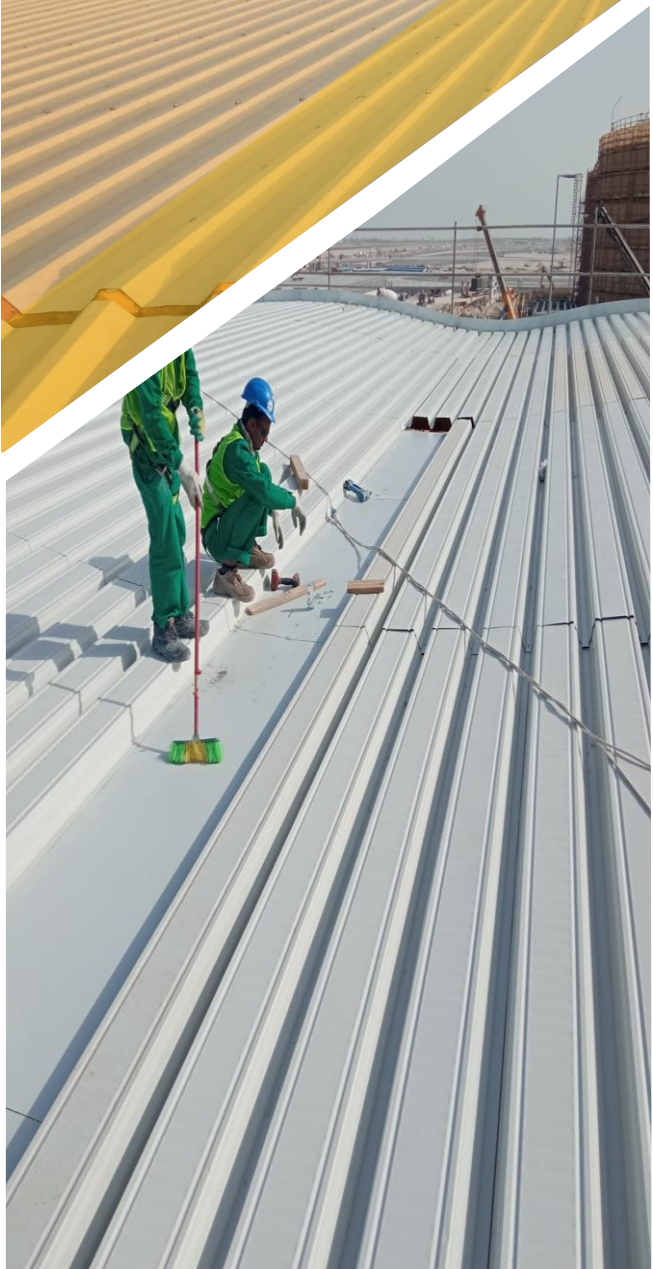

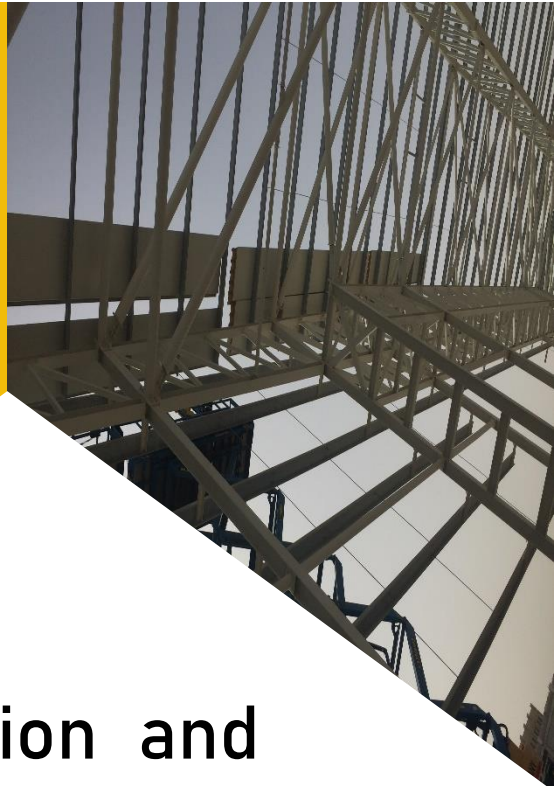

- Towers
- Swimming Pools

OIL AND GAS

- Civil Works
- Laying of Pipe Lines
- Provision and Fixing of Refractory Bricks

MEP

- Heating, ventilating and air conditioning systems
- Plumbing
- Power Distribution and Lighting

Installation and maintenance

OUR COMPANY COVERS THE FOLLOWING AREAS:

Installation of equipment are performed in the automotive, pharmaceutical and other industries. We can provide our clients a complete service in design, engineering, production (with our partner), installation in new buildings, dismantling and assembling by the renovations and all the necessary tasks in the repair.

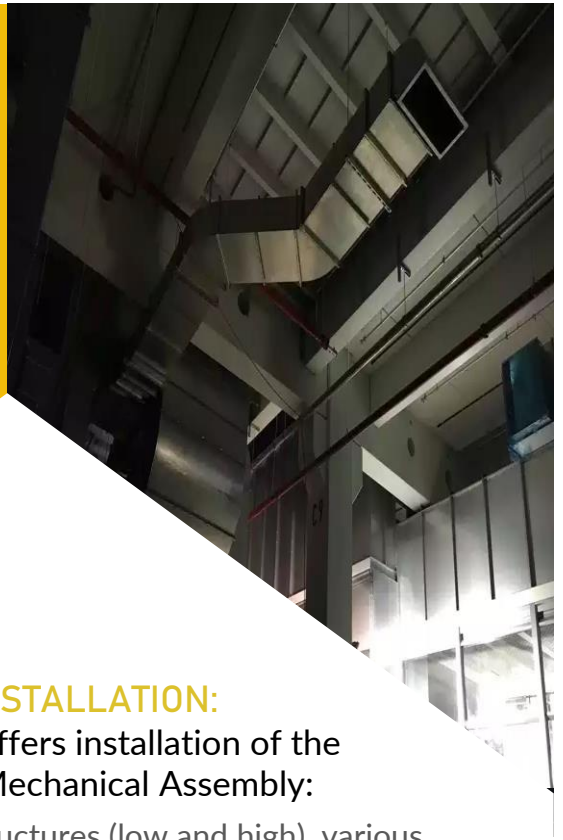

Trained for:

VENTILATION SYSTEM:

installation of all types of channels (unimat, Falco, welded channels)

- load-bearing and support structure of the iron
- Railings and Stairs
- Walking Surfaces
- Conveyor belts of all types and sizes access equipment
- lifting tables
- various EHB systems
- Heating, Ventilating, and Air-Condition System

MECHANICAL INSTALLATION:

Perfect Building offers installation of the various types of Mechanical Assembly:

- Mounting Structures (low and high), various sheds, towers, silos and, etc.
- Installation of a conveyor (floor and hanging)
